

M.I.F. Tools v 1.2

"It's magic, it's MIF."

Thank you for buying this package. You won't be disappointed !

First of all, you should make a copy of this disk.

You have documentations about all the programs of the utilities in the .DOC files on the disk.

If anyway you should have a problem with the M.I.F. Tools (disk crash, bug, question...),
please write to Noldas :

New if MIF Tools v 1.2 :

- BMP2MIF now accepts any size of BMP pictures (but the picture must still be 24 bits !).
- Automatically add borders for constant aspect ratio.
- Error diffusion allowed in screen 12, for even better picture quality.
- You can convert screen 12 to screen 8 pictures with MIF.COM.
- Scroll bar added on the right in the FILE LIST BOX of MIF.COM.
- Faster loading and displaying of pictures.
- Bug corrected in the CENTER function (when in screen 6 and 7).
- Commented and clearer sources of MV and BMV.

Have fun !
